Dean of Faculty

I. Course Identification and General Information:

1	Course Title:	Fixed Prosthodontics I (Pre-Clinical)			
2	Course Code & Number:	----			
3	Credit Hours:	Credit Hours	Theory Hours		Lab. Hours
			Lecture	Exercise	
		3	2	--	2
4	Study Level/ Semester at which this Course is offered:	3 rd Level / 1 st Semester			
5	Pre –Requisite (if any):	Dental Morphology I , II and Dental Materials I, II			
6	Co –Requisite (if any):	None			
7	Program (s) in which the Course is Offered:	Doctor of Dental Surgery (DDS)			
8	Language of Teaching the Course:	English			
9	Study System:	Semester based System			
10	Mode of Delivery:	Full Time			
11	Location of Teaching the Course:	Faculty of Dentistry			
12	Prepared by:	Dr. Mohammed A. AlBaili			

II. Course Description:

An introduction to the science and art of fixed prosthodontics, basic theoretical topics essentially with the clinical application of basic fixed Prosthodontics procedures on the phantom head and basic fixed Prosthodontics laboratory procedures on the dental lab. The students will study the basic concepts of Principles of Tooth Preparation, Full crown preparation for cast restoration, Porcelain fused to metal Crowns and Steps of preparation, All ceramic crowns and Steps of preparation, Partial veneer crowns and Steps of preparation of posterior and anterior partial veneer crowns, Tissue management and gingival retraction, Impression materials and techniques and Bite registration or recording.

III. Course Intended Learning Outcomes (CILOs): Upon successful completion of the course, students will be able to:		Referenced PILOs Learning out of program	
A. Knowledge and Understanding:		I, A or E	
a1	Show the knowledge and understanding of the basic principles for the theory and practical of the Fixed Prosthodontics,		A1
a2	Demonstrate the dental material sciences, and their applications and manipulations and the concepts related to the clinical and laboratory procedures of Fixed Prosthodontics		A2
a3	Describe the broader issues of dental practice, including ethics and medico-legal considerations of Fixed Prosthodontics preparation and constructions.		A3
B. Intellectual Skills:			
b1	Diagnose and analyze the clinical problems of the oral cavity and paraoral structures and create a proper treatment plan of Fixed Prosthodontics		B1
b2	Compare the properties of various dental materials and their clinical and laboratory applications in FPs preparation and constructions with talking awareness and strive to provide the highest possible quality of patient care at all times.		B2
b3	Collect and integrate information from number of resources to gain a coherent understanding of theory and practice and interpret the evidence to understand practice of clinical that related to Fixed Prosthodontics.		B3
C. Professional and Practical Skills:			

c1	Practice the practical and clinical skills in phantom lab and crown and bridge lab, working safely environment that reflect skilled competent, safe, evaluative clinical dentistry practice.		C1
c2	Demonstrate the ability to deal and manipulate dental biomaterials properly that related to Fixed Prosthodontics preparation and constructions.		C2
c3	Apply correct judgments and skills that lead to correct infection control, diagnosis and treatment of art and science of Fixed Prosthodontics.		C3

D. Transferable Skills:

d1	Communicate effectively with a wide range of individuals using a variety of means and work effectively as individual or as a team member in phantom lab and crown and bridge lab.		D1
d2	Manage time, priorities, workload and manage personal emotions and stress, do self-evaluation within academic, professional, clinical and practical performance and determine career opportunities and challenges and suggest proper solutions, during the clinical and laboratory procedures of Fixed Prosthodontics construction (in phantom lab and crown and bridge lab)		D4
d3	Manage changes effectively and responds to changing demands, take responsibility for personal and professional learning and development and solve the problems facing him in his daily life effectively, during the clinical and laboratory procedures of Fixed Prosthodontics construction (in phantom lab and crown and bridge lab).		D5

(A) Alignment of Course Intended Learning Outcomes (Knowledge and Understanding) to Teaching Strategies and Assessment Methods:		
Course Intended Learning Outcomes	Teaching Strategies	Assessment Strategies
a1 Show the knowledge and understanding of the basic principles for the theory and practical of the Fixed Prosthodontics, includes the principles of teeth preparation and the teeth preparations of different types of crown restorations.	Lecture Discussion	Quizzes Midterm Exam Final Exam
a2 Demonstrate the dental material sciences, and their applications and manipulations and the concepts related to the clinical and laboratory procedures of Fixed Prosthodontics preparation constructions	Lecture Discussion	Quizzes Midterm Exam Final Exam
a3 Describe the broader issues of dental practice, including ethics and medico-legal considerations of Fixed Prosthodontics preparation and constructions.	Lecture Discussion	Quizzes Midterm Exam Final Exam
(B) Alignment of Course Intended Learning Outcomes (Intellectual Skills) to Teaching Strategies and Assessment Methods:		
Course Intended Learning Outcomes	Teaching Strategies	Assessment Strategies
b1 Diagnose and analyze the clinical problems of the oral cavity and paraoral structures and create a proper treatment plan of Fixed Prosthodontics preparation and constructions.	Lectures Self-learning Training Discussion Brainstorming	Quizzes Midterm Exam Final Exam Practical exam

b2	Compare the properties of various dental materials and their clinical and laboratory applications in Fixed Prosthodontics preparation and constructions with talking awareness and strive to provide the highest possible quality of patient care at all times.	Lectures Self-learning Training Discussion Brainstorming	Quizzes Midterm Exam Final Exam Practical exam
b3	Collect and integrate information from number of resources to gain a coherent understanding of theory and practice and interpret the evidence to understand practice of clinical that related to Fixed Prosthodontics.	Lectures Self-learning Training Discussion Brainstorming	Quizzes Midterm Exam Final Exam Practical exam

(C) Alignment of Course Intended Learning Outcomes (Professional and Practical Skills) to Teaching Strategies and Assessment Methods:

	Course Intended Learning Outcomes	Teaching Strategies	Assessment Strategies
c1	Practice the practical and clinical skills in phantom lab and crown and bridge lab, working safely environment that reflect skilled competent, safe, evaluative clinical dentistry practice.	Training Discussion	Practical Exam Observation
c2	Apply correct judgments and skills that lead to correct diagnosis and treatment of art and science of Fixed Prosthodontics.	Training Discussion	Practical Exam Observation
c3	Demonstrate the ability to deal and manipulate dental biomaterials properly that related to Fixed Prosthodontics preparation and constructions.	Training Discussion	Practical Exam Observation

(D) Alignment of Course Intended Learning Outcomes (Transferable Skills) to Teaching

Strategies and Assessment Methods:		
Course Intended Learning Outcomes	Teaching Strategies	Assessment Strategies
d1 Communicate effectively with a wide range of individuals using a variety of means and work effectively as individual or as a team member in phantom lab and crown and bridge lab.	Discussion Seminars Self-learning.	Observation Practical Exam Semester Work
d2 Manage time, priorities, workload and manage personal emotions and stress, do self-evaluation within academic, professional, clinical and practical performance and determine career opportunities and challenges and suggest proper solutions, during the clinical and laboratory procedures of Fixed Prosthodontics constriction (in phantom lab and crown and bridge lab)	Discussion Seminars Self-learning.	Observation Practical Exam Semester Work
d3 Manage changes effectively and responds to changing demands, take responsibility for personal and professional learning and development and solve the problems facing him in his daily life effectively, during the clinical and laboratory procedures of Fixed Prosthodontics constriction (in phantom lab and crown and bridge lab).	Discussion Seminars Self-learning.	Observation Practical Exam Semester Work

IV. Course Contents:					
A. Theoretical Aspect:					
No.	Units/Topics List	Sub Topics List	Number of Weeks	Contact Hours	Learning Outcomes (CILOs)
1	Introduction to Course	<ul style="list-style-type: none"> - Definition - Extracoronar restoration - Intracoronar restoration - Intraradicular restoration - Component of FPD - Purposes and Indications of Crown Construction. 	2	4	a1, b2
2	Principles of Tooth Preparation.	<ul style="list-style-type: none"> - Preservation of tooth structure. - Retention and Resistance form, and Path of Insertion - Structure durability - Marginal integrity, and the Types of Finishing Line - Preservation of Periodontium - Instrumentation. 	3	6	a1, a2, b1, b2
3	Full crown preparation for cast restoration.	<ul style="list-style-type: none"> - Indications, Contra-indications, Disadvantages and Advantages of Full Metal Crowns - Steps of Tooth preparation. 	1	2	a1, b1
4	Introduction to PFM Crowns and Steps of preparation.	<ul style="list-style-type: none"> - Indications, Contra-indications, Disadvantages and Advantages of PFM Crowns - Steps of Tooth preparation 	1	2	a1, b1
5	Midterm Exam	MCQs and essay questions	1	2	a1, a2, b1, b2
6	Introduction to all ceramic crowns and Steps of preparation	<ul style="list-style-type: none"> - Indications, Contra-indications, Disadvantages and Advantages of All Ceramic Crowns - Steps of Tooth preparation. 	1	2	a1, b1
7	Introduction to partial veneer	<ul style="list-style-type: none"> - Indications, Contra-indications, Disadvantages and Advantages of 	2	4	a1, b1

No.	Units/Topics List	Sub Topics List	Number of Weeks	Contact Hours	Learning Outcomes (CILOs)
	crowns and Steps of preparation of posterior and anterior partial veneer crowns	<ul style="list-style-type: none"> Partial Veneer Crowns. Steps of Tooth preparation of Posterior 3/4 Crown, Anterior 3/4 Crown, and Other Modifications, 7/8, Half Crown, and Reverse 3/4 Crown. 			
8	Introduction to Tissue management and gingival retraction	<ul style="list-style-type: none"> Classification of tissue retraction Mechanical tissue retraction Chemical-mechanical retraction Electrosurgery Removal of the edentulous cuff and Crown lengthening. 	1	2	a3, b3
9	Impression materials and Impression techniques	<ul style="list-style-type: none"> Classification Elastic Impression Materials Elastomeric impression material Polysulfide Rubber Base Condensation Silicone Additional Silicone Polyether Techniques of Impression Making Stock impression Tray Custom Impression Tray Impression Making of Elastomeric Materials Manual mixing - Auto Mixer, Evaluate the impression. 	2	4	a3, b3
10	Bite registration or recording	<ul style="list-style-type: none"> Definition Mounting using a pink base plate wax technique Bite registration paste (ZOE) Occlusion rimes 	1	2	a3, b3
11	Final Exam	MCQs and essay questions	1	2	a1, a2, a3, b1, b2, b3
Number of Weeks /and Units Per Semester			16	32	

B. Case Studies and Practical Aspect:				
No.	Tasks/ Experiments	Week Due	Contact Hours	Learning Outcomes (CILOs)
1	laboratory preparation of lower first premolar	Week 2,3	4	b1, c1, c2, d2
2	laboratory preparation of lower second premolar	Week 4	2	b1, c1, c2, d2
3	laboratory preparation of lower first molar	Week 5,6	4	b1, b2, c1, c2, d2
4	laboratory preparation of lower second molar	Week 7,8	4	b1, c1, c2, d2
5	laboratory preparation of upper first premolar	Week 9, 10	4	b1, b3 c1, c2, c3, d1, d2, d3
6	laboratory preparation of upper second premolar	Week 11	2	b1, b3 c1, c2, c3, d1, d2, d3
7	laboratory preparation of upper first molar	Week 12	2	b1, b3 c1, c2, c3, d1, d2, d3
8	laboratory preparation of upper second molar	Week 13,14	4	b1, b3 c1, c2, c3, d1, d2, d3
9	Practical exam	Week 15	2	b1, b2, b3 c1, c2, c3, d1, d2, d3
Number of Weeks /and Units Per Semester		14	28	

V. Teaching Strategies of the Course:

- Lectures
- Discussions
- Brainstorming
- Training
- Seminars
- Self-learning.

VI. Assessment Methods of the Course:

- Quizzes
- Midterm Exam
- Final Exam
- Practical Exam
- Observation
- Semester Work

VII. Assignments:

No.	Assignments	Week Due	Mark	Aligned CILOs (symbols)
1	Practical Requirements	2 nd - 14 th	10	b1, b2, b3 c1, c2, c3, d1, d2, d3
Total			10	

VIII. Schedule of Assessment Tasks for Students During the Semester:

No.	Assessment Method	Week Due	Mark	Proportion of Final Assessment	Aligned Course Learning Outcomes
1	Assignments	2 nd - 14 th	10	10%	b1, b2, b3 c1, c2, c3, d1, d2, d3
2	Quizzes	6 th	10	10%	a1, a2, b1, b2
3	Midterm Exam	8 th	20	20%	a1, a2, b1, b2
4	Practical Exam	15 th	20	20%	b1, b2, b3 c1, c2, c3, d1, d2, d3
5	Final Exam	16 th	40	40%	a1, a2, a3, b1, b2, b3
Total			100	100%	

IX. Learning Resources:

1- Required Textbook(s):

- 1- Shillingburg,H,T,etal. :Fundamentals of Fixed Prosthodontics, 4Edition. Quintessence.
- 2- Rosenstiel, S.E.Land.M.F.,:Contemporary Fixed Prosthodontics- Fujimoto Fourth Edition.

2- Essential References:
1 - Shillingburg.H.T.atel, : Fundamental of Tooth Preparation for Cast Metal and Porcelain. 2 - Smith et al.: Planning and Making Crown and Bridges Last Edition.
3- Electronic Materials and Web Sites etc.:
1- http://www.bsspd.org/For*patients/fixed*prosthodontics.aspx 2- http://www.epadental.org/patients/fixed-prosthodontics

X. Course Policies: (Based on the Uniform Students' By law (2007))	
1	Class Attendance: Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.
2	Tardiness: A student will be considered late if he/she is not in class after 10 minutes of the start time of class.
3	Exam Attendance/Punctuality: No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.
4	Assignments & Projects: Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.
5	Cheating: Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
6	Forgery and Impersonation: Forgery/Impersonation is an act of fraud that results in the cancelation of the student's exam, assignment or project. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
7	Other policies: The University official regulations in force will be strictly observed and students shall comply with all rules and regulations of the examination set by the Department, Faculty and University Administration.

III. Course Description:

An introduction to the science and art of fixed prosthodontics, basic theoretical topics essentially with the clinical application of basic fixed Prosthodontics procedures on the phantom head and basic fixed Prosthodontics laboratory procedures on the dental lab. The students will study the basic concepts of Principles of Tooth Preparation, Full crown preparation for cast restoration, Porcelain fused to metal Crowns and Steps of preparation, All ceramic crowns and Steps of preparation, Partial veneer crowns and Steps of preparation of posterior and anterior partial veneer crowns, Tissue management and gingival retraction, Impression materials and techniques and Bite registration or recording.

IV. Course Intended Learning Outcomes (CILOs) :

Fixed Prosthodontics I (Pre-Clinical)

Upon successful completion of the Course, student will be able to:	
	A. Knowledge and Understanding:
a1	Show the knowledge and understanding of the basic principles for the theory and practical of the Fixed Prosthodontics,
a2	Demonstrate the dental material sciences, and their applications and manipulations and the concepts related to the clinical and laboratory procedures of Fixed Prosthodontics
a3	Describe the broader issues of dental practice, including ethics and medico-legal considerations of Fixed Prosthodontics preparation and constructions.
	B. Intellectual Skills:
b1	Diagnose and analyze the clinical problems of the oral cavity and paraoral structures and create a proper treatment plan of Fixed Prosthodontics
b2	Compare the properties of various dental materials and their clinical and laboratory applications in FPs preparation and constructions with talking awareness and strive to provide the highest possible quality of patient care at all times.
b3	Collect and integrate information from number of resources to gain a coherent understanding of theory and practice and interpret the evidence to understand practice of clinical that related to Fixed Prosthodontics.
	C. Professional and Practical Skills:
c1	Practice the practical and clinical skills in phantom lab and crown and bridge lab, working safely environment that reflect skilled competent, safe, evaluative clinical dentistry practice.
c2	Demonstrate the ability to deal and manipulate dental biomaterials properly that related to Fixed Prosthodontics preparation and constructions.
c3	Apply correct judgments and skills that lead to correct infection control, diagnosis and treatment of art and science of Fixed Prosthodontics.
	D. Transferable Skills:
d1	Communicate effectively with a wide range of individuals using a variety of means and work effectively as individual or as a team member in phantom lab and crown and bridge lab.
d2	Manage time, priorities, workload and manage personal emotions and stress, do self-evaluation within academic, professional, clinical and practical performance and determine career opportunities and challenges and suggest proper solutions, during the clinical and laboratory procedures of Fixed Prosthodontics constriction (in phantom lab and crown and bridge lab)
d3	Manage changes effectively and responds to changing demands, take responsibility for personal and professional learning and development and solve the problems facing him in his daily life effectively, during the clinical and laboratory procedures of Fixed Prosthodontics constriction (in phantom lab

and crown and bridge lab).
