**Course Identification and General Information:** I. 1 **Course Title:** Computer Skills 2 Course Code & Number: UNI109 Theory Hours Credit 3 Lab. **Credit Hours:** Hours Lecture Exercise Hours 3 2 2 Study Level/ Semester at which this 4 1<sup>st</sup> Level / 1<sup>st</sup> Semester Course is offered: 5 Pre-Requisite (if any): None 6 Co-Requisite (if any): None Program (s) in which the Course is All programs (University Requirement 7 **Offered:** Courses) Language of Teaching the Course: 8 English/Arabic 9 **Study System:** Semester Based System 10 **Mode of Delivery:** Full Time Location of Teaching the Course: 11 Depend on the program 12 **Prepared by:** Dr. Adnan Almutawkkil 13 **Date of Approval:** 

#### II. Course Description:

The aim of this course is to give student the fundamentals of computer. It focuses on introduction to computer topics with an emphasis on learning about computer, operating systems, application software, Internet, and applying software using MS Office. The course helps student to learn about the importance of computers and how to use computers.

n successful completion of the cours				
Outcomes (CILOs) : Upon successful completion of the course, students will be able to:				Referenced PILOs
Knowledge and Understanding:		A · E		
scribe basic knowledge of computer ics, operating systems, hardware and tware.	1		A1	Demonstrate an understanding of appropriate concepts, theories, mathematical foundations, models and techniques related to Information technology discipline.
ntify the main components of a aputer system, including the CPU, nory, storage devices, input/output ces, and operating system.	I		A2	Identify the computing desired needs for different computer- based systems, components, processes and human factors, and consider them during the selection, integration, and administration technologies to meet the organization's goals.
tellectual Skills:				guadant 5 goals.
ore the appropriate table and ula using spread sheet.	I	I	B1	Propose appropriate information technology-based solutions and integrate them effectively into the user and organization environment.
tigate the impacts of operating ns, application software and et on the organization needs.	I	в		Analyze the impacts of computing on organizational objectives and customer needs, and consider them during the analytical processing, selection, integration, configuration and administration of computer- based systems.
fessional and Practical Skills:				
n fundamental computer ons, such as starting up and g down a computer, navigating	I	C1	l F a	Employ effectively the second
	<pre>ics, operating systems, hardware and ware. tify the main components of a puter system, including the CPU, hory, storage devices, input/output ces, and operating system. tellectual Skills: ore the appropriate table and lla using spread sheet. igate the impacts of operating hs, application software and et on the organization needs. fessional and Practical Skills:     fessional and Practical Skills </pre>	scribe basic knowledge of computer         ics, operating systems, hardware and         ware.         tify the main components of a puter system, including the CPU, nory, storage devices, input/output ces, and operating system.         tellectual Skills:         ore the appropriate table and la using spread sheet.         igate the impacts of operating ns, application software and et on the organization needs.         I         fessional and Practical Skills:         n         fundamental computer ons, such as starting up and	ics, operating systems, hardware and ware.       I         tify the main components of a puter system, including the CPU, hory, storage devices, input/output ces, and operating system.       I         tellectual Skills:       I         tellectual Skills:       I         igate the impacts of operating hs, application software and et on the organization needs.       I         fessional and Practical Skills:       I         n       fundamental computer ons, such as starting up and up a	scribe basic knowledge of computer ics, operating systems, hardware and ware.IAlltify the main components of a puter system, including the CPU, nory, storage devices, input/output ces, and operating system.IA2tellectual Skills:IB1ore the appropriate table and ila using spread sheet.IB1igate the impacts of operating ns, application software and et on the organization needs.IB2fessional and Practical Skills:IC11a fundamental g down a computer, navigatingIC11

	III. Course Intended Learning Outcomes (CILOs) : Upon successful completion of the course, students will be able to:			Referenced PILOs
c2	the operating system, managing files and folders.			technologies in the problem- solving process.
	Use common productivity tools, such as word processors, spreadsheets, and presentation software tools.	I	C2	Use information technology infrastructure approaches and tools to specify, design, implement, develop and document appropriate solutions.
	D. Transferable Skills:		L	a solutions appropriate solutions.
d1	Work effectively both in a team and independently	I	D1	Work effectively within a team or individually to accomplish a common goal

	(A) Alignment of Course Intend Understanding) to Teaching Str	ed Learning Outcomes (K ategies and Assessment M	Knowledge and lethods:
	Course Intended Learning Outcomes	Teaching Strategies

		X. Course Policies: (Based on the Uniform Students' By law (2007)
		Class Attendance:
	1	Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.
		Tardiness:
	2	A student will be considered late if he/she is not in class after 10 minutes of the start time of class.
		Exam Attendance/Punctuality:
	3	No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.
		Assignments & Projects:
	4	Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.
		Cheating:
4	5	Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
		Forgery and Impersonation:
6		Forgery/Impersonation is an act of fraud that results in the cancelation of the student's exam, assignment or project. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
		Other policies:
7	1	The University official regulations in force will be strictly observed and student comply with all rules and regulations of the examination set by the Department. Here the University Administration.

## V. Teaching Strategies of the Course:

- lectures
- Presentation
- Interactive class discussions
- Laboratory based sessions
- Directed self- study/ Independent learning
- Problem solving
- Team work (group learning)

#### VI. Assessment Strategies of the Course:

- Written tests (Mid and final Exams)
- Quizzes
- Practical lab sessions
- Presentations
- Written assignments
- Oral exams

No.	Assignments	Week Due	Mark
1	Assignment 1: write a report using word processing	7	500
2	Assignment 2: create a worksheet with a table, chart and formulas	14	

V	II. Assignments:		
No.	Assignments	Week Due	Mark
3	Assignment 3: Create a presentation about a topic related to computing	15	5
	Total		15

# VIII. Schedule of Assessment Tasks for Students During the Semester:

No.	Assessment Method	Week Due	Mark	<b>Proportion of Final Assessment</b>
1	Assignments	7,14,1 5	15	15%
2	Mid-Term Theoretical Exam	8	10	10%
3	Mid-Term Practical Exam	8	5	5%
4	Final Practical Exam	16	20	20%
5	Final Theoretical Exam	16	50	50%
	Total		100	100%

#### IX. Learning Resources:

#### 1- Required Textbook(s) ( maximum two ):

- 1. Kendall E. Martin; Alan D. Evans; Mary Anne Poatsy, 2020, "Technology in action: complete", Sixteenth Edition, Pearson Education.
- Misty E. Vermaat, Susan L. Sebok, Steven M. Freund, Jennifer T. Campbell, Mark Frydenberg, 2017, Discovering Computers 2018: Digital Technology, Data, and Devices, 1st ed, Cengage Learning.

#### 2- Essential References:

1. Darrell W Hajek, Cesar Herrera, 2017, Introduction To Computers, , CreateSpace Independent Publishing.

#### 3- Electronic Materials and Web Sites etc.:

Websites:

- 1. https://pll.harvard.edu/course/cs50s-understanding-technology-0
- 2. https://www.geeksforgeeks.org/basics-of-computer-and-its-operations/

	X. Course Policies: (Based on the Uniform Students' By law (2007)
	Class Attendance:
1	Class Attendance is mandatory. A student is considered absent and shall be banned from taking the final exam if his/her absence exceeds 25% of total classes.
	Tardiness:
2	A student will be considered late if he/she is not in class after 10 minutes of the start time of class.
	Exam Attendance/Punctuality:
3	No student shall be allowed to the exam hall after 30 minutes of the start time, and shall not leave the hall before half of the exam time has passed.
	Assignments & Projects:
4	Assignments and projects must be submitted on time. Students who delay their assignments or projects shall lose the mark allocated for the same.
	Cheating:
5	Cheating is an act of fraud that results in the cancelation of the student's exam or assignment. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
	Forgery and Impersonation:
6	Forgery/Impersonation is an act of fraud that results in the cancelation of the student's exam, assignment or project. If it takes place in a final exam, the penalties stipulated for in the Uniform Students' Bylaw (2007) shall apply.
	Other policies:
7	The University official regulations in force will be strictly observed and students shall comply with all rules and regulations of the examination set by the Department, Faculty and University Administration.
